

HydraSpecma Strengthens Its Global Position with Expansion in Stargard

HydraSpecma is taking a significant step into the future by expanding into its state-of-the-art production facility in Stargard, Poland. This decision is part of the company's strategy to strengthen its global market position as a leading provider of high-quality hydraulic solutions by increasing competitiveness and optimizing production efficiency.

HydraSpecma will expand its capacity at their new production facility in Stargard, Poland, marking a significant milestone in the company's strategic growth plan. This state-of-the-art factory, twice the size of the previous facility, underscores HydraSpecma commitment to strengthening its operational investments and increasing production capacity across key product segments, including **Fluid Conveyance, Hydraulic Integrated Circuits (Manifolds), and Power System HPUs.**

Fully powered by solar energy, the new factory aligns with HydraSpecma sustainability initiatives and meets the evolving Environmental, Social, and Governance (ESG) requirements of OEM customers and stakeholders. By integrating renewable energy solutions, the facility will not only help reduce the company's carbon footprint but also promote environmentally responsible practices within the local community.

Key Benefits of the Expansion:

- **Increased Production Capacity:** The factory's expanded space will accommodate growing customer demand across core product areas.
- **Sustainable Operations:** A fully solar-powered facility reinforces HydraSpecma dedication to ESG principles, strengthening its position as a responsible and forward-thinking industry partner.
- **Enhanced Competitiveness:** The expansion allows HydraSpecma to optimize production processes, maintain cost efficiency, and drive continued innovation.

As part of this strategic initiative, HydraSpecma consolidates its European manufacturing footprint.
